The proposal is in a wrong location. Most people would support the proposal if location was away from houses and families with children.

There was no tender. The proposal is a little known company of father and daughter who do not live in the area.

We have to care for health of all Australans living in the country.

I am objecting to the proposal in the proposed location.

The proposed plant should be build far away from residential area. Australia is a huge country.

NO! to the proposal in the current location.
