*I object to the building of the Moss Vale Plastics Recycling facility due to the potential environmental impact of air pollution from the 'stacks' (or vents) that may be released from the ventilation system. I live and work within the 15km radius where it is suggested that we should keep our children indoors on days where the air hazard reaches a higher level. As a rate payer, a local property owner, a local working member of the community who can not restrict her days work to remain within an office I understand that my health will be impacted. I also object to the monumental increase in traffic it will bring in to the Southern Highlands into an infrastructure that can not sustain the constant flow of heavy vehicles/ trucks. I object to the Moss Vale Plastic Refinery due to the direct affect it will have on the vicinity to nature corridors, and water runoff that deposits directly into our and the greater Sydney water catchment areas has the potential to be catastrophic.*
