I have a right to clean air and clean water as do our children and all animals. How can permission be given for plastics recycling, right on the doorstep of our beautiful community? Why here?

In the event of a fire we will have particles raining down on our houses and a deadly smoke plume.

I have a respiratory condition that is likely to be made worse by this development. Is our health worth nothing? Is it only the dollar that matters?

I cannot believe how this project can be worth the huge risks associated with it.
