I object to the proposed plasrefine on the following ground:

-It is located too close to residential properties, schools and daycare sites

-Potential for microplastics to enter nearby creeks that feed the Wingecarribee river, which will eventually reach Sydney water catchment area.

-Air pollution- VOCs will be released through the refinement process, posing high risks to humans and animals, and could negatively impact local agriculture and farming.

-increased light and heavy traffic will cause issues such as noise, vibration, dust, road degradation. Does plasrefine pay for road repairs?

-high fire risk in an area where fire services are already stretched thin.
