I strongly object to the development of a Plastic Recycling Facility at 74-76 Beaconsfield Road,

Moss Vale for the following reasons:

During my travels I saw the growing effects plastic is having on our environment. Whilst I think recycling is beneficial I don't think Plasrefine should be the company carrying out this role. Their technology only allows for items to be recycled 1-2 times. I feel we should be using more modern approaches such as plastic enzymatic recycling or the conversion of plastic to energy. As a young adult it is sad to see such outdated methods still being considered, especially when nanoplastics can have serious effects on our health and natural environment

Where the Plastic Recycling Facility is intended to be built is on beautiful, open, farmland.

Here many flora and fauna species would be negatively impacted by the clearing of land and the light, sound and air pollution emitted. This includes interfering with animal breeding patterns, nightlife activities and food sources
