I am a Moss Vale resident and I strongly oppose the proposed development of the Plasrefine facility. I'm concerned about the potentially devastating environmental, health and economic impacts of this facility and apparent lack of care, research and diligence that has gone into the planning of this facility. Due to the apparent lack of care and knowledge that Plasrefine has regarding how this facility will affect the food and water supplies for the region, wildlife and the surrounding environment, the health of the community, the tourism industry, local infrastructure and the scientific research being done at nearby bio labs, the construction of this facility is completely unacceptable. I do not support it.
