Submission ID: 217508

Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Other issues</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/23/2024 9:09:11 PM

Moss Vale is my home. Moss Vale is my family and friends home. Moss Vale is where my children are still being raised and I hope my grandchildren will also be raised.

This will impact our health, wellbeing and the lifestyle my family live. This industrial monstrosity will ruin our way and my communities way of life. How dare the state government even think about doing this to our home, my community. Moss Vale and the rest of our villages are already suffering due to lack of infrastructure due to state government pushing other development on our beautiful home. Moss Vale is a perfect place to still raise our children to be kids and have a lifestyle allowing development and exploration outdoors that has fresh and safe air. Our Pristine environment provides Sydney with their water for drinking. what happens to the greater populations drinking water contaminated with poison and what happens to our native retiles, mammals, amphibians, insects and birds that thrive in our water ways or the grazing stock that also drink from this water. Our kids still swim in the waterways where poisonous water will flow.

This toxic infrastructure will potentially stop tourists visiting which will be disastrous to Moss Vales small businesses who are owned by and support local families. To whom ever thought and to the participants passing this through government why don't you put it in your back yard.

I certainly detest this facility in my home town and will stand and fight with our Moss Vale

Community to kick this in the arse.

This is not the right site.
