I am objecting to the plastics refinery in Moss Vale for the below reasons.

- Risk of water contamination*
- Risk of food contamination*
- Safety risk to the local children and neighbouring schools*
- Risk of air pollution*
- Increased traffic in area*

The plastic refinery poses serious risks to community health and wellbeing. I see no logical reason as to why anybody would build such a facility so close to human residences and human activity. I find it difficult to understand how this location has been chosen considering all the health and social risks particularly when there is so much other land area that could be considered for this facility.
