I am a young person living in Bowral with my parents, sister and husband. My husband and I moved here for a better life. We were tired of the hustle, bustle and stress of city living.

As people living with chronic illnesses, allergies and asthma, we moved to the Highlands to recover and get better and restart our lives again.

I strongly object to plasrefine being built in Moss Vale.

It is NOT the right site.

I worry for the future health of our community if we are exposed to toxic microplastics that the plasrefine facility would spew into the air and water.

We know of other recycling sites in Australia that do not use this much water, let alone that would leak toxic waste back into the main water supply - which is what Plasrefine will do if built in our area.

GHD has said that we can limit our exposure to the contaminated air they would create out of their factory by staying indoors. THAT IS RIDICULOUS.

I beg of you, there needs to be better research into how we can make this facility in the right place, in the right way to recycle our waste the way that is BEST for the environment, for the community and for Country.
