

ROBYN SPEERIN

OBJECT

Submission ID: 216966

Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/22/2024 9:26:48 AM

I strongly object to this development in my town as the application is obviously flawed and inadequate on so many aspects. It is not evidence informed in relation to many requirements for a safe yet effective business. I don't object to plastic recycling in itself but it needs to be located 100s of kilometres from where humans live and active farming is practiced. In addition the safety of workers must be of prime consideration. Many others have made submissions that are evidence informed to back up my profound concerns. As a retired woman with my now adult children and teenage grandchildren living in close proximity (we are all in Moss Vale) I am gravely concerned for our health and we will be blood tested at the outset if this development goes ahead and regularly in subsequent years. We can't sit and wait for health issues to occur from toxins in our bodies so we will be proactive in seeking any causes of ill health.

Toxins will be in the air, in our locally sourced food and water.

And it's not just us in the Southern Highlands who will be affected from the poisons this development as it stands. Our river is a feeder into what eventually goes to Sydney residents.

I also worry about our local businesses, many of whom rely on tourism. What becomes of them as our visitors come to realise we are no longer a safe place to enjoy a get away.

Please do not approve this development application!
