As a visitor to Moss Vale for short holiday stays I find this proposal highly inappropriate for such a pristine area. There are many factors that don't seem to have been considered in the process that are very hard to believe. - sheer size of plant- constant trucks arriving and departing 24/7- microplastics being eliminated into the air and Sydney's water supply- displacement in food chain - closeness to existing properties/homes - statement from potential developers to just stay indoors, this is a major red flag. - effect on tourism, - effects on local traffic. This facility is totally unacceptable for this area
