I am extremely concerned about the proposal of the new site. We are a young family with a 2 year old and another baby due in January and the impacts of microplastics in the air and waterways is a huge concern for health, not to mention impacts on the environment. This will also de-value of our property which we worked very hard to purchase last year. We believe this is not the right area for the site, please consider the long term impacts on the community, land and businesses across the region. I don't understand how these factories can be considered when the health concerns of microplastics are proven to be harmful.
