I vehemently object to the proposed recycling facility in Moss Vale. It is categorically not the right site for the facility for many reasons. The impacts to air quality and waterways from micro-plastics and chemicals with the proposed site sitting on 2 riparian zones. The issues with roads and traffic with the proposed facility operating 12 hours a day and the fact that this site is less than 200m from residential areas with no buffer zone. As a resident, the objection is not to a recycling facility but rather this proposal and the place proposed.
