To the Minister concerned, I believe this project has no place in this area. It needs to be far more remote, in a dedicated space where its environmental impacts can be contained and managed in isolation from any local residential community. This spectacular area of our state that is so valued by it's locals and visiting tourists is unquestionably the wrong location for such industry. Plasfine will find another location and will be ok. Please do not preside over the pollution of this perfect part of the world that will not be.

Thankyou for honouring the faith that has been put in you in my vote.
