Sir or Madam

Whilst I read that the modern systems that deal with plastic waste is nowadys non polluting, I also read of the great problems in this recycling process, showing that less that half the recycled plastics can be reused. The remainder is too degraded to be of use. This means that as well as the 35-40 trucks per day delivering to the site approx 15-20 trucks will be needed to take away this unwanted rubbish. No mention has been made of this extra traffic and no mention of the siting of there destination landfill site. Please clarify the situation with honesty and integrity if possible.

I also refer to the excellent 14 page document produced by Duncan Wood of the Moss Vale Matters Community group.

These concerns MUST be addressed otherwise you risk extreme social unrest.

regds Jennifer
