Location: 2577 New South Wales	
Attachment: N/A	

Submission date: 10/27/2024 5:25:09 PM

This proposal will affect the entire community on a negative level, the traffic, congestion, with amount of trucks moving through the area will impact everyone already living here. Environmental issues with the toxicity of plastics in the area, plus leakage into our pristine waterways and affecting surrounds. The impact of the ugly building in the area, the concrete companies bad enough an ugly eyesore protruding in a beautiful landscape that's bad enough plus the chicken factory equally ugly. It is a must beautiful area, with protected historical architecture, surround, farming and stunning country side. Why on earth would anyone in their right mind even think of proposing this in this area? Put it in an already industrialised area. Where there's no possibility of contamination to waterways, to the environment -the people, animals, farmland. Why would the council, government even contemplate this proposal in such a beautiful and protected area. It is unbelievable to even consider such a proposal. We said no to the mine, we are saying no to this plastic proposal!
