I grew up in Moss Vale. I still have family in the local area.

I am opposed to this development on environmental grounds. It is unacceptable and intolerable that in the existing climate of a global environmental crisis it is considered acceptable to establish a processing plant close to a community, farmland, wildlife and waterways that will impact the quality of the landscape, the air, the water.

It is not democracy when the privileged few that a right and a voice that is heard above the voices of the majority.

When residents say NO it is the responsibility of those that are in positions of power, who are meant to be in service to the public (aka government bodies are Public Servants) to listen and follow their lead.
