My wife and I strongly opposed to this development in its current location. This is based on traffic congestion numerous heavy using a narrow urban road which passes a child care centre. The visual solution of a 4 story building, the potential for water usage and potential pollution. The process will operate 24 hours per day with will impact on local community which lives near the factory, and the local wild life. A factory like this, which process the increasing pollution of plastics, is probably required but not in a local area.
