I object to the plasferine facility with the impacts on human health due to the fumes and particles that will fall in and around our communities and natural bushland including the Wingecarribee river and rivulets that feed into it.

Please do not put this amongst a community that values nature, fresh air, good health and place it in a more remote setting which doesn't impact so many people and animal habitats. It has the potential to impact many food chains including grazing cows nearby and many many more.
