As a resident of the Southern Highlands living close to the proposed site for Plastic Refinery my main concern regarding the site is

A. Pollution - impact from waste - infiltration of partials into run off into the water catchment area for Southern Highlands and Sydney water supply.

B. The impact of heavy traffic affecting Moss Vale and surrounds. The current infrastructure does not support additional traffic, and more importantly in this case the frequency of heavy vehicles and routes available to them in servicing the site of the proposed factory.

C. I object to the impact this site will have on neighbouring properties - households and businesses in relation to the close proximity- noise, traffic, chemical waste pollution, smell that will directly affect surrounds.

The site is clearly too close to existing farmland, water catchment, residential and business premises that will be adversely affected by this site.

I believe a more suitable site should be sought by the company.
