I object to this proposal for the sake of our environment and the health of our community. These microplastics in the environment will have a debating effect on the environment and also the health of all those living down in the highlands as the microplastics find their way into our drinking water and the particles in the air. This is a beautiful and natural environment. This should be placed in an area far away from the rich natural beauty of our regions and for the health of our children and ourselves. Please do not let typos development proceed.
