*I object to the proposed development of the plasrefine facility in Moss Vale. The environmental implications are huge the health impacts also potentially huge and both irreversible if this is allowed to go ahead. This is the wrong location for this development. At a time when micro plastic pollution, PFAS & PFOS contamination in drinking water and cancer clusters have clear cause and effect relationships established a decision which would allow such a development seems dangerous and irresponsible. It is also not just the Southern Highlands that will suffer the effects but surrounding cities that access water (Sydney) from this catchment area. This can not be allowed to go ahead*
