The areas infrastructure namely the roads can not cope with the amount of traffic that will be generated from this development. Also the environment would suffer greatly from the pollution this will generate. Southern Highlands has some beautiful birds and mammals that require a clean environment to triive and this type of development has bern proven to effect the water and air quality. I refer to a study done in Canada that has this type of development and the chemicals it generates are very bad for people and animals. I moved to the Southern Highlands 5 years for health reasons. Please do not let this development go in as i believe people and animals will suffer as a result.
