Submission ID: 209869

Organisation: N/A	Key issues: <i>Social impacts, Land use compatibility (surrounding land uses), Traffic</i>
Location: 2577 New South Wales	
Attachment: N/A	

Submission date: 10/28/2024 5:41:25 PM

*There is far too much risk associated with a project like this. The environmental impact really needs to be considered and the risk that microplastics will cause to our community. Especially given the fact our hospital is small and the availability of specialists is low. From an environmental perspective, we are do privileged to live in such a beautiful area, one of the most beautiful in the country, and this will cause so much damage to our wildlife and waterways. Again, why take the risk? Not to mention a drop in tourist numbers drastically impacting the income of local business owners. Finally, from traffic perspective, our roads are already at breaking point, and maintaining the existing infrastructure is already difficult and expensive. This will significantly increase traffic and heavy vehicle related damage which the council and tax payer will need to pay to maintain and fix.*

*Overall, the risk is far too high and risks one of our countries most beautiful gems. Not the right site!*
