Whilst I am supportive of environmental policies and progress that benefits our immediate and wider communities, I object to a foreign owned plastic recycling plant that will engage with unfamiliar processes and practices. Micro plastics are well researched and documented for their very harmful health impacts. This is distressing to learn there could be an approval for a plant within less than 5km from such a wonderful and large town centre, home to young families, retirees and students.. Moss vale is also a growing town with a large tourist and cultural opportunity that will be hampered no doubt
