The recycling plant is toxic to our health and environment. It will impact the health of our children and in my case grandchildren as well for me personally. I spend a lot of time in Moss Vale helping my daughter & her husband manage work, school etc I come down weekly from Sydney to do this for three or four days. I am a chronic asthmatic and this will have an impact on me being in a position to help my family and the important time we have together.

In addition there are schools to consider as there is a number of them in the vicinity as well as the older community. The effects from this processing plant will impact the community over many decades.

I can't believe the callousness of a Government prepared to do this so close to a vibrant community- are you â€˜tone deaf'.

The long term health and well being of a community is being jeopardised by your ill conceived plan - NO
