Hello,

What a heinous crime against the Earth and the citizens of this country shire.

People who live here, abide here because they enjoy the fresh air and natural climate where children and families can be raised in the best conditions.

This factory reverses the idyllic nature of the Highlands and stains the area with a type of industry that is founded on complete garbage science and has no basis in reality, nature, health or indeed usefulness.

Plastics are a scourge on the Earth, and recycling them is inefficient, costly, damaging, toxic and is just government trying to drum up jobs, probably for mostly immigrants.

I can't say how disgusted I am that this proposal has been ferried through by the corrupt individuals who are pushing this thing.

I represent a organisation who's chief aim is to protect childhood by keeping the link between nature and childhood alive in a world full of mad projects, industries and people that wish to promote terrible ideas such as this.

You ought to be ashamed of yourselves. Back to the drawing board for you lot, no sense in this, I hope you see the light, not the bottom line.

Regards

Asher @ Life Rocks
