*I am a local resident living within 1km of the proposed site and have lived here for 30years.*

*I am terrified about the serious threat to air quality I have happily lived enjoying this beautiful clean environment with dogs and garden.*

*I understand the the proposed Plasrefine has large roller doors that will be facing west. Knowing the wind and weather as I do I cannot believe that the factory is stating they will catch all nano particles from the recycling/reprocessing process. With 50 truck movements in and out of the doors Mon-Fri how is this possible! Even my car roller door whips up lots of dust in my garage.*

*They state the trucks will be coming in on a designated route and again I ask how is this going to be monitored? Surely the trucks will often take the quickest route.*

*The Hazardous of fire is very real as recycling facilities do catch fire more often than not. This would be catastrophic for our community environment, and animals.*

**NOT THE RIGHT SITE!!**
