*The applicants consultant mentioned items in the online meeting on 12 June that appear to address issues I raised in my presentation.*

*I cannot find any information in the lodged documentation that demonstrates their assertions.*

*I believe the application should be determined on the lodged documents.*

*Specifically the asserted that sprinkler water discharged in the building in the event of a fire would be contained in underground tanks and be removed from site by a specialist contractor.*

*If a BCA report had been prepared then the huge footprint of the building would require a Fire Engineering Brief to be provided and assessed by the certifier. Then Fire and Rescue NSW would need to approve the additional dry and wet fire provisions. I believe this final approval would not be provided - the dangers to life for workers and the firefighters would be too great.*
