As a mother of 3 I am concerned for the environmental and health impacts of the proposed Plasfrefine recycling plant. Particularly, I believe a thorough independent report should be undertaken and made public before any decision is made regarding its placement. I am concerned about the impact on air quality and drinking water given its proximity to my home and the water catchment.

Many of my neighbours and I choose to live in the Southern Highlands in order to protect our health from pollutants. I urge the committee to redirect this development into an area that is further away from the dense and growing population of Moss Vale and surrounds.
