My main concern is the potential and unknown contamination of the Sydney & Goulburn drink water catchments.

It is also unknown what environmental impact the potential pollution this plastic recycling factory could have on surrounding grass feed cattle and sheep farming and agricultural land.

There are too many unknown environmental hazards.

It beggars belief that this proposed largest plastic recycling factory in the Southern Hemisphere would be only metre from existing and approved residential homes, it is entirely the wrong site for this proposal.

The local fire fighting resources are totally inadequate in this area & these facilities are known for their potential toxic fire risk.

I beg you to please reconsider this proposal in such an inappropriate area.
