I'm Heidi Baxter, I'm [REDACTED] and me and my family and friends don't want to be growing up in a world full of plastic fibers that we can't see and having it laying around waiting to kill someone or something.

For my entire life me and my dad have been leasing roughly 60 acres off the Garvan property management where we agist both harness racing and polocrosse horses. We usually have around 8-10 horses there and they thrive on the lush pastures and clean fresh water from the dams there.

From what I have seen from research on airborne plastic fibers, that cannot be seen, but can float and land in waterways and dams which my horses drink from.

So PLEASE don't let this go ahead,

it will be a better environment for everyone and everything

Please don't let this happen.
