I object to this factory being built on the proposed site as it will not only wreck the local biodiversity, it will also affect the water table and water supply, as well as become a fire hazard. The Southern highlands will not be able to cope with the traffic and we do not have an adequate fire fighting system. Given the previous Hume Recycling fire was unable to be contained even with numerous fire trucks and air support, the southern highlands has absolutely no chance of fighting any fires that come from this proposed factory and it will utterly devastate our air quality and ecosystem.
