*I am appalled and outraged that Australia's biggest plastics recycling facility is being recommended for approval on a site that's in the Sydney drinking water catchment with nano, micro plastics, PFAS (forever chemicals) which will be less than 200m from residential homes without a buffer zone. Our health and safety should be put before corporate profits and our children should grow up in an area free from dangerous micro-plastics. Australia doesn't deserve to be taken over by [REDACTED]. Absolutely abhorrent.*
