*I do not want cancer causing chemicals leaching into the water supply and being blown through the air harming the local children in Moss Vale and the surrounding towns.*

*The location is too close to the community (nowhere in the world is a plastics refinery this close! And for good reason.) Especially as we don't have appropriate community firefighting resources to reduce the catastrophic impact of a fire and how that will put lives and local businesses at risk.*

*If this facility is built it will mean that my family will likely be forced to move out of the area due to the substantial risks.*
