I am writing to express my strong opposition to the proposed Plasrefine recycling facility in Moss Vale. While recycling is important, I believe this development poses significant risks to the health and wellbeing of our community.

Key Concerns:

Air Quality: The facility's operations could release harmful pollutants and microplastics into the air, potentially leading to respiratory problems and other health issues.

Water Contamination: The potential for chemical leaks or spills poses a serious threat to local waterways and drinking water sources.

Noise Pollution: 24/7 operations will generate noise disturbances, negatively impacting residents' quality of life and sleep patterns.

Traffic Congestion: Increased truck traffic will disrupt local roads, increase traffic accidents, and create noise and air pollution.

Community Impact: The facility's proximity to residential areas raises concerns about property values, decreased amenity, and the overall character of our community.

I urge you to consider the long-term health and environmental consequences of this development. We need a recycling solution that prioritises the well-being of our community.

Sincerely,

Mittagong
