I am OBJECTING to the proposed plastic recycling in Moss Vale on the following grounds –

1. Too close to residential areas.
2. Too close to the Garvan Institute.
3. Too close to schools and child care centres.
4. There will be an increased heavy vehicle traffic. Moss Vale's roads are already inadequate and the increase heavy vehicle movements will cause more damage to our roads and our roads will not cope with the added traffic.
5. Air pollution is a major factor. We live in a clean environment and this will greatly change our environment and landscape for the worse.
6. Threat to bats and the platypus to name a few.
7. Too close to riparian zones.
8. We have farming, agriculture and wineries throughout the area and this will cause environmental impacts on their livelihoods and our health.
9. Concern for chemicals in plastic.

We moved to Moss Vale in 2019 from the suburbs of Sydney to escape the pollution, heavy traffic and unhealthy environment. Moss Vale is a clean, beautiful environment to raise a family. The roads are not adequate (which we knew and accepted coming to Moss Vale). It is a country town and will not tolerate the truck movements and pollution anticipated.

Please support the local community on this issue, the site is NOT the right site.

The land should be set aside for more housing and farming/agriculture activities.
