As a father of three boys, my youngest son asked me on the way to school yesterday, why would they relocate rubbish from another city to our home, this is a terrible idea and I don't want to live here anymore. Hard to find any reasonable way to justify the proposal. Apart from a reasonable financial injection into the community, which would be absorbed into road and infrastructure repairs within a few years, the logic behind this proposal is difficult to support and will create an unwanted and negative legacy for future generations within our community.
