I object to this development as I fear for the future of my children. I fear for the future implications this development will have on the health of all residents within the area. This development's site in Moss Vale is the wrong location. I cannot fathom how it was approved in the first place.

Surely the health of residents comes first. Will local councils and governments be supportive of residents in years to come, if and when they begin to show health systems that are impacted by the development? I doubt it. And this is why it must be moved to another area. An area that is not close to towns and villages.

We understand the health implications of microplastics - so why would we allow thousands of Highlands residents to be exposed to such toxic substances?

Please make the right decision. This development lays heavy on my heart.
