Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: New South Wales 2577	
Attachment: N/A	

Submission date: 11/13/2024 1:20:41 PM

*There are many unresolved issues with this proposed development. Appropriate studies and mitigation strategies have not been done. The proposed development is not supported or appropriate for this community. Significant investigation and discussion has been held within the local community and the community do not want the proposed development here. The site chosen is not appropriate and the operations of the proposed development will impact negatively on the environment including water pollution, air quality, traffic etc and the overall strength of what this community has to offer. The proposed development is not in keeping with why people choose to live here. There is a strong view the proposed development is a threat to the future and cohesion of this community. The development should be located at an appropriate site within a heavy industrial zone. Basically it's the wrong site and it's clear the community, local business and council don't want it here. State planning should be required to consult with local community before they go ahead and make decisions that will impact on our quality of life. Choosing a more appropriate site is the right thing to do.*
